

**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the instant application:

**Listing of Claims:**

1. (Currently Amended) A method for presenting system services comprising the steps of:

categorizing said system services by functional groups;

displaying at least a portion of said system services within a graphical user interface according to said categories;

establishing a plurality of system service profiles;

detecting a request for the presentation of system services;

ascertaining a server identity that provides said system services;

determining one of said system service profiles associated with said request, wherein said determining is based at least in part upon said ascertained server identity; and

listing at least one system service in accordance with a system service profile.

2. (Original) The method of claim 1, further comprising the step of ascertaining a user identity associated with said request, wherein said determination of said system service profile is based at least in part upon said ascertained user identity.

3. (Cancelled)

4. (Currently Amended) The method of claim 1, further comprising the step[[s]] of:  
categorizing said system services by computing device; and  
~~displaying at least a portion of said system services within said graphical user~~

~~interface according to said categories.~~

5. (Original) The method of claim 4, said categorizing step further comprising the step of:

categorizing services according to servers that provide said services.

6. (Original) The method of claim 1, said establishing step further comprising the step of:

providing a system services configuration interface so that authorized users can modify at least one system service profile.

7. (Original) The method of claim 6, said providing step further comprising the steps of:

providing a series of views to perform a task relating to at least one system service profile in a step-wise fashion, whereby said series of views represent a system service profile configuration wizard.

8. (Original) The method of claim 1, wherein the system services are Microsoft (TM) system services that execute within a Microsoft (TM) type operating system.

9. (Original) The method of claim 1, wherein said system services are presented within a graphical user interface included within the Microsoft Configuration Utility (TM).

10. (Original) The method of claim 1, wherein said system services profiles are integrated with the directory services of an operating system handling said system services.

11. (Currently Amended) A machine-readable storage having stored thereon, a computer program having a plurality of code sections, said code sections executable by a machine for causing the machine to perform the steps of:

categorizing said system services by functional groups;

displaying at least a portion of said system services within a graphical user interface according to said categories;

establishing a plurality of system service profiles;

detecting a request for the presentation of system services;

ascertaining a server identity that provides said system services;

determining one of said system service profiles associated with said request, wherein said determining is based at least in part upon said ascertained server identity; and

listing at least one system service in accordance with a system service profile.

12. (Original) The machine-readable storage of claim 11, further comprising the step of ascertaining a user identity associated with said request, wherein said determination of said system service profile is based at least in part upon said ascertained user identity.

13. (Cancelled)

14. (Currently Amended) The machine-readable storage of claim 11, further comprising the steps of:

categorizing said system services by computing device; and

~~displaying at least a portion of said system services within said graphical user interface according to said categories.~~

15. (Original) The machine-readable storage of claim 14, said categorizing step further comprising the step of:

categorizing services according to servers that provide said services.

16. (Original) The machine-readable storage of claim 11, said establishing step further comprising the step of:

providing a system services configuration interface so that authorized users can modify at least one system service profile.

17. (Original) The machine-readable storage of claim 16, said providing step further comprising the steps of:

providing a series of views to perform a task relating to at least one system service profile in a step-wise fashion, whereby said series of views represent a system service profile configuration wizard.

18. (Original) The machine-readable storage of claim 11, wherein the system services are Microsoft (TM) system services that execute within a Microsoft Windows(TM) type operating system.

19. (Original) The machine-readable storage of claim 11, wherein said system services are presented within a graphical user interface included within the Microsoft Configuration Utility (TM).

20. (Original) The machine-readable storage of claim 11, wherein said system services profiles are integrated with the directory services of an operating system handling said system services.

21. (Currently Amended) A system for presenting system services comprising:
- means for categorizing said system services by functional groups;
  - means for displaying at least a portion of said system services within a graphical user interface according to said categories;
  - means for establishing a plurality of system service profiles;
  - means for detecting a request for the presentation of system services;
  - means for ascertaining a server identity that provides said system services;
  - means for determining one of said system service profiles associated with said request, wherein said determining is based at least in part upon said ascertained server identity; and
  - means for listing within a graphical user interface at least one system service in accordance with a system service profile.

22.-26. (Cancelled)
